Art Unit: 2876

DETAILED ACTION

1. Claims 1-9 and 19-26 withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.
2. Applicant's election without traverse of the invention drawn to a method of making an article during a telephone conversation is acknowledged.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Art Unit: 2876

4. Claims 10-18 are rejected under 35 U.S.C. 102(e) as being anticipated by Griffs et al. (US 6,401,919) (hereinafter referred to as 'Griffs').

Griffs teaches a package 100 for carrying stable components 114. Once the stable components 114 are placed in compartments of the package 100, an opening of the compartment is closed with a flap. The flap may be sealed with a label 116 on which information associated with the contents of the compartment (including one or more of a part number, a serial number, and a version of the software application) is provided (col. 5, lines 40-47; col. 7, lines 15-27). The package 100 is shrink wrapped and a label 122 on which identifying information about the contents of the package is printed in the form of a bar code is applied (col. 6, lines 45-55).

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Koda et al. (US 5,984,176) teach a manufacturing method of electronic devices having identification numbers.

Kelly, Jr. (US 5,900,610) teaches an apparatus and method for tracing inventory of multiple goods in multiple shipping cartons.
